

AUTHORITY PACK

BEFORE YOU CHOOSE A CONCRETE CONTRACTOR

The real difference between a cheap quote and concrete that still looks good years from now.

Premium concrete. Less upfront strain.

Interest-free payment options available up to \$15,000. Limited allocation applies.

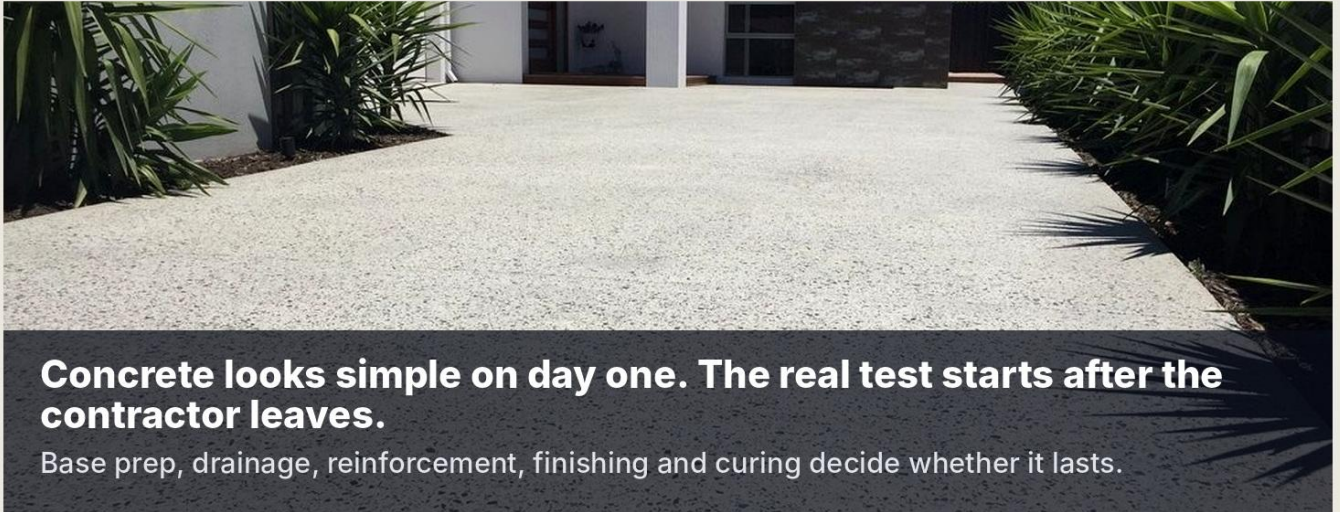

5-year workmanship warranty

Fully documented works

One point of contact

Residential + commercial

Luke | 0403 292 005 | luke@smoothconcrete.com.au | smoothconcrete.com.au

Concrete looks simple on day one. The real test starts after the contractor leaves.

Base prep, drainage, reinforcement, finishing and curing decide whether it lasts.

Most customers compare concrete quotes like the only difference is price. That is dangerous. A cheap quote often means someone is removing time, material, supervision, insurance, documentation or after-care from the job.

The driveway still looks fine in the first week. The problems usually show later - cracking, movement, ponding water, rough finish, dusting, trip hazards and contractors who stop answering the phone.

1 What you see

A clean new slab on handover.

2 What matters

Compaction, steel, falls, joints and curing.

3 What can cost you

Repairs, removal, repour and disputes.

THE LOWEST PRICE CAN BECOME THE MOST EXPENSIVE PART OF THE JOB

If someone is dramatically cheaper, ask what has been removed. The risk is rarely visible in the quote - it is hidden in the base, the steel, the falls, the joints, the curing and the warranty.

Warning signs in a cheap concrete quote

- Vague inclusions or no written scope
- No reinforcement detail or joint plan
- Pressure for cash without professional documentation
- No clear base preparation or compaction detail
- No insurance, SWMS or warranty paperwork

8 questions to ask before you choose anyone

1 What thickness and base depth are included?

2 How will the sub-base be compacted?

3 What reinforcement is included and how is it supported?

4 Where will control joints and expansion joints go?

5 How will falls and drainage be set?

6 Who supervises the pour on the day?

7 What happens if there is an issue after handover?

8 Can I see insurance, SWMS and warranty terms in writing?

Quality is not a slogan. It is a sequence of decisions.

The finish people see is only the last step. The concrete survives because the hidden work is done properly.

01 Site prep

Excavation, levels and access planned before the pour.

02 Base & compaction

The slab is only as reliable as what sits under it.

03 Reinforcement

Steel, support and joints matched to the job.

04 Falls & drainage

Water is directed where it should go.

05 Hand finish

Edges, joints, surface and clean-up handled properly.

06 After-care

Curing, sealing advice and realistic expectations.

BUILT FOR CLIENTS WHO WANT IT DONE PROPERLY

Smooth Concrete is set up for customers who care about finish, communication and long-term value - not just the cheapest number on paper.

One point of contact

Luke personally oversees every project from quote to handover.

Transparent pricing

Clear inclusions, assumptions, staged payments and no vague line items.

Professional documentation

ABN, insurance certificates, SWMS and project paperwork available.

Quality-focused crew

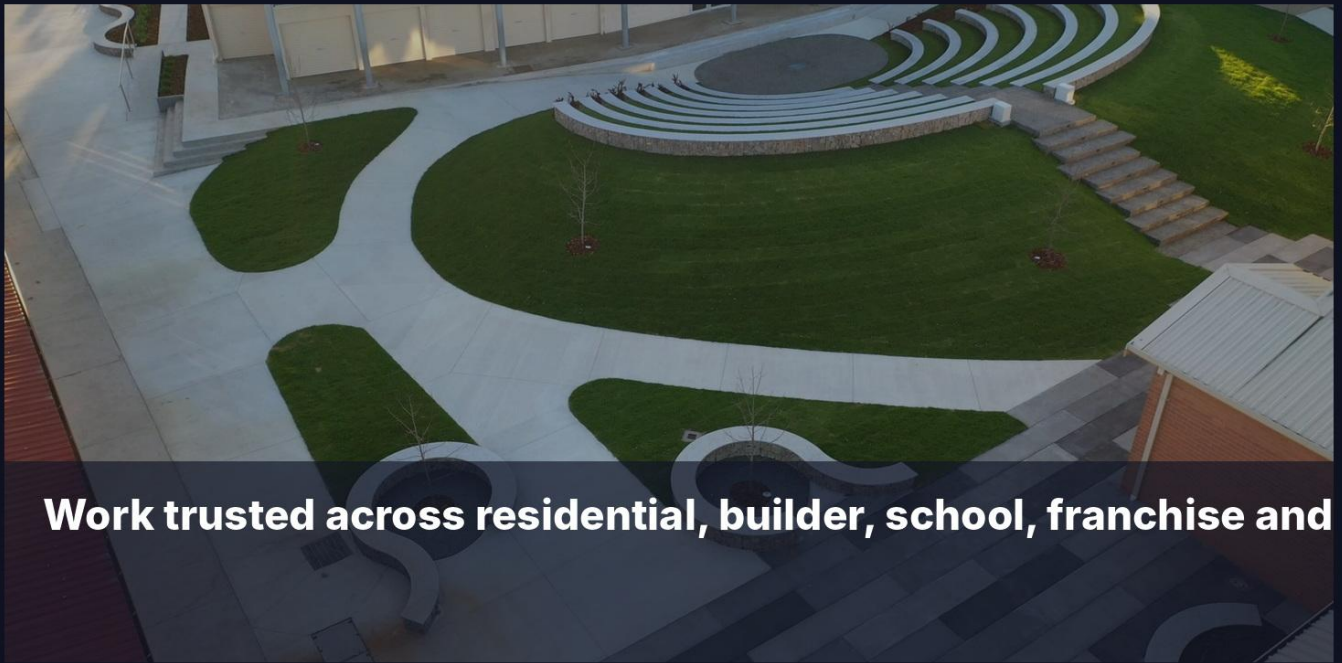

Every pour is prepared, placed and hand-finished to suit the job.

Warranty & after-care

Workmanship guarantee and realistic guidance after handover.

Trusted experience

Residential, commercial, institutional and builder-led projects across Melbourne.

Work trusted across residential, builder, school, franchise and

Selected project experience

2,000m2 residential driveway

C3 Build - ongoing projects

Why this matters

Cheap contractors can look good on small easy jobs. Bigger clients, schools, builders and commercial sites require coordination, documentation, safety paperwork, quality control and accountability. That same professional standard is brought to residential driveways and private projects.

Concrete work for homes, builders and commercial sites across Melbourne.

Driveways

Pool surrounds

Institutional works

Driveways

Broom, trowel, exposed aggregate and coloured finishes.

Exposed aggregate

Premium decorative finish for driveways, paths and surrounds.

Coloured concrete

Oxides, integral colour and architectural finishes.

Slabs

Garage, shed, basement, internal and commercial slabs.

Paths & ramps

Access paths, DDA-style ramps, steps and landings.

Crossovers

Council-compliant crossovers and front-of-property works.

A clean process reduces stress before the concrete is even poured.

You should know what is happening, what is included and what to expect at every stage.

1

Enquiry & instant quote

Use the online calculator or send photos, measurements, finish and address.

2

Quote & booking

Clear scope, inclusions, exclusions and deposit-to-book structure.

3

Preparation

Excavation, formwork, base, compaction and reinforcement.

4

The pour

Concrete placed, screeded and hand-finished to the selected finish.

5

Curing & handover

Usage timelines, after-care advice and what is normal during curing.

6

Support after the job

Questions after handover are answered. We do not disappear.

We are upfront about concrete - and we put our workmanship commitment in writing.

Concrete is a natural product. Minor hairline cracking, colour variation and curing marks can happen. The difference is whether your contractor explains what is normal, builds correctly and stands behind workmanship issues.

5 YEARS

Workmanship guarantee

Installation quality, finish, levels, joints and reinforcement workmanship.

7 YEARS

Structural integrity

Major structural issues linked to workmanship, subject to warranty terms.

3 YEARS

Surface / decorative

Spalling, delamination or aggregate loss from workmanship issues.

We do not sell fake promises

Any contractor who tells you concrete will never crack is not being honest. What matters is proper preparation, correct joint placement, controlled curing, realistic expectations and a contractor who answers the phone if something needs attention.

Full warranty terms and exclusions are provided with your quotation.

THE BEST WORK SHOULD NOT BE LIMITED TO THE LOWEST UPFRONT BUDGET

You can choose premium concrete and spread the payment pressure, instead of gambling on a cheap contractor just to reduce the upfront hit.

Interest-free payment option

Available up to \$15,000

Subject to eligibility, approval and current allocation. Ask Luke to confirm whether the current offer intake is still available.

Limited positions are kept available so projects can still be supervised properly.

Do the job once

Avoid paying twice because the cheap job failed.

Protect the property

Concrete affects access, drainage, curb appeal and resale impression.

Keep cashflow easier

Get the right finish now without the same upfront strain.

Reputation is built after the concrete cures.

Real clients, real outcomes, and a business built on repeat trust.

- ■ *We engaged Smooth Concrete to do major works to a heritage building. Outstanding result and Smooth Concrete did not disappoint.*
- Swinburne University

- ■ *Professional, on time and on budget. Luke runs a tight ship and delivers.*
- Alistair Tweddle, Resolute Building Services

- ■ *Stunning outcome. Luke mentoring his team throughout. Exceptional attention to detail.*
- Bill Alexander

- ■ *Luke and the team were amazing. Quality work, professional, highly recommend.*
- Ari Labunda, Director, C3 Build

- ■ *Very high quality work. Easy to deal with, punctual, and always communicative.*
- Jonathan Dunlea

READY TO LOCK IN THE RIGHT CONTRACTOR?

If you are comparing quotes, compare more than the number. Compare the risk, the preparation, the communication, the warranty and the person who will actually answer the phone after the job is finished.

Get your project moving

- Confirm your quote and preferred finish
- Ask Luke about current interest-free availability
- Reserve your start window before the allocation is gone
